PROFESSIONAL SUMMARY

Frontend Software Engineer specializing in React, TypeScript, and modern web development. Experienced in building responsive web applications, integrating cloud-based services, and delivering scalable user interfaces across education, automotive, and operational systems. Passionate about performance optimization, accessibility, and creating intuitive user experiences for modern digital products.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Vite, Responsive UI/UX Design.

Data & Cloud: Firebase (Auth, Firestore), REST API Integration, Real-time Data Synchronization.

Tools & Process: Git, GitHub, Docker, Postman, CI/CD, Agile/Scrum Methodologies.

SOFTWARE ENGINEERING EXPERIENCE

Founder & Lead Engineer | PropertyPulse AI Feb 2026 – Present

- Developing an AI-assisted customer interaction platform using React, TypeScript, and Firebase.
- Building responsive dashboards, conversational workflows, and real-time data interfaces while maintaining scalable frontend architecture and type-safe state management.

Software Engineer | Katsina Security & Incident Reporting System (AI-KSCSIRS) Aug 2025 – Jan 2026

- Developed a real-time incident reporting and monitoring platform using React, TypeScript, Firebase Authentication, and Firestore.
- Implemented real-time data synchronization workflows and responsive dashboards to improve incident visibility and reporting efficiency.

Software Engineer | KSITM Virtual Learning & Collaboration Platform Jan 2025 – July 2025

- Built a web-based educational dashboard supporting over 1,500 student users through responsive interfaces and dynamic data workflows.
- Refactored legacy frontend modules into reusable React components, improving maintainability and reducing future development effort.

Contract Software Engineer | KT Almadina Motors International Ltd June 2023 – Dec 2023

- Developed a responsive frontend platform for showcasing vehicle listings, improving customer interaction and online engagement.
- Built search and filtering functionality to enhance vehicle discovery, navigation flow, and mobile user experience across various devices.

Contract Software Engineer | Agile Engineering & Technical Services Jan 2023 – May 2023

- Optimized browser rendering and asset compilation, significantly reducing page load times through tactical lazy-loading and code-splitting.

FEATURED PROJECTS

PropertyPulse AI: AI-powered customer interaction platform. React, TypeScript, Firebase, OpenAI API.

Katsina Security & Incident Reporting System: Real-time reporting dashboard. React, TypeScript, Firebase.

Smart Home Energy Dashboard: IoT monitoring dashboard for real-time energy metrics. React, TypeScript.

Global Dine: Restaurant platform with integrated multi-currency conversion workflows. React, TypeScript.

EDUCATION & CERTIFICATIONS

Bachelor of Science (B.Sc.) in Software Engineering | KSITM Institute of Technology 2025

Graduated with Distinction (CGPA: 4.6/5.0)

Certifications: AI Master Certification (Microsoft & UNICEF), Remote Proficiency Certification.
