PROFESSIONAL SUMMARY

Frontend Software Engineer with 4 years of experience delivering clean web interfaces using React and TypeScript. Specializing in component state design, client-side rendering optimizations, and dynamic data integration for cloud-backed platforms serving over 1,500 active users. Proven capacity for remote-first work, featuring structured documentation workflows and fully redundant power and internet infrastructure.

TECHNICAL SKILLS

Frontend Stack: TypeScript, React.js, JavaScript (ES6+), React Context API, Vite, Tailwind CSS, Responsive UI Layouts

Data & Cloud: Firebase (Authentication, Cloud Firestore Client Sync, Hosting), Asynchronous REST API Integration

Tooling & Workflows: Git, GitHub Enterprise, Docker Configurations, Postman Testing, CI/CD Actions, Agile/Scrum

AI & Interface Streaming: Microsoft AI Framework Tools, Client-Side LLM Webhook Text Streaming Interfaces

SOFTWARE ENGINEERING EXPERIENCE

Founder & Lead Engineer | AI Receptionist SaaS Platform

Feb 2026 – Present

Tech Utilities: React.js, TypeScript, Context API, Client-Side Streaming, AI LLM Webhooks

- Developing a highly responsive React administration dashboard that renders streaming customer token data with zero thread-blocking.
- Enforcing strict TypeScript type definitions across complex client-side application states, ensuring bug-free data synchronization.

Software Engineer | Security & Incident Management System

Nov 2024 – Present

Tech Utilities: React.js, TypeScript, Live Real-Time Document Subscriptions, Firebase Auth Hooks

- Engineered an emergency alert terminal UI utilizing reactive state boundaries, ensuring a verified 99.9% application uptime.
- Mapped decoupled Firebase Firestore listener states to the interface, lowering dynamic layout synchronization latencies to under 2 seconds.

Software Engineer | University E-Learning Platform

Jan 2024 – Oct 2024

Tech Utilities: React.js, Modular Component UI Libraries, Distributed Client Layout States

- Shipped a comprehensive educational dashboard providing fluid real-time interactions for over 1,500 active campus student users.
- Refactored legacy template layouts into highly cohesive, reusable component sub-trees, cutting frontend maintenance cycles by 40%.

Contract Software Engineer | KT Almadina Motors International Ltd

June 2023 – Dec 2023

Tech Utilities: React.js, TypeScript, Tailwind CSS, Performance Search Layouts

- Built an automotive marketplace frontend, lifting user lead conversions by 45% through a low-latency client filtering grid.
- Optimized DOM asset rendering and layout bounds to guarantee high fluidity across constrained mobile network viewports.

Contract Software Engineer | Agile Engineering & Technical Services

Jan 2023 – May 2023

Tech Utilities: React.js, JavaScript, Code-Splitting Optimization, Asset Compilation

- Accelerated browser rendering load times by 50% by introducing code-splitting parameters and tactical lazy-loaded component trees.

OPEN-SOURCE PROJECTS

Smart Home Energy Monitoring Dashboard

- Built an IoT energy dashboard processing live metrics via strict TypeScript interfaces: github.com/Sinsydev/smart-home-energy

Global Dine Multi-Currency Platform

- Created a restaurant menu platform handling live currency conversions: github.com/Sinsydev/global-dine

EDUCATION & CERTIFICATIONS

Bachelor of Science (B.Sc.) in Software Engineering

Graduation: 2025

KSITM Institute of Technology | CGPA: 4.6 / 5.0 (Distinction Standard)

- Certifications:** AI Master Certification (Microsoft & UNICEF) | Remote Proficiency Certification
